Rays of Sunshine vs Clouds of Darkness

Look at the SolarAid case studies and think about these two questions:

✔ What problems do kerosene lamps cause children in East Africa?
✔ How has solar energy helped children in East Africa?

Think about their health, education, financial situation and the environment. Write the disadvantages of the kerosene lamp in the clouds of smoke and the advantages of solar power in the rays of sunshine.

**Clouds of Darkness**

Education:

Health:

Environment:

Money:
You could cut these shapes out, draw a sun and a kerosene lamp and then stick them together to make a display or piece of art!
